

IDEAL Air PRO App

Always stay connected. Simple handling of modern technology at home and on the go.

From the condition of indoor air and temperature, over adjusting the power, to online weather data: The IDEAL Air PRO app allows you to see and change all the functions of the air purifier in an intuitive way. Easily operate, control, and program all functions from anywhere in the world. This app supports iOS 6.0 and higher, as well as Android 4.12 (Jelly Bean) and higher.

Intelligent control
Automatic control and online remote control of your IDEAL PRO air purifier.

Detailed measurements
In addition to class PM2.5 and PM10 particulate matter, temperature, air humidity, and air pressure are also measured in real time.

Clear visualization
All measured values are displayed in the IDEAL AIR PRO app. The air quality at the unit is displayed in parallel using a color-coded scheme made up of three colors.

REMOTE ACCESS BEYOND THE APP

The AP40, AP60, AP80, and AP140 PRO come with a handy remote control for convenient operation. Sit back and relax.

¹PRO models require a constant 2.4 GHz WiFi connection in order to use app.

IDEAL PRO AIR PURIFIERS

843-552-2700 • www.mbmcorp.com

AP30 PRO | AP40 PRO

Compact air purification

The compact AP30 Pro and AP40 Pro air purifiers combine a sleek design, quiet operation, and energy efficiency. The 360° multi layer filter system with a long-life HEPA filter consists of a fine mesh prefilter, true HEPA filter, and activated carbon filter.

Optimum airflow
The 360° smart filter system is also equipped with RFID intelligence for an easy filter change. The AP40 Pro includes a premium textile cover.

Compact power
High quality control is powered by the Easy-Touch button, making it intuitive and convenient. Functions: on / off, auto, level 1/2/3, turbo, and night mode.

Low service costs
The long-life HEPA filter means that the filter only needs to be changed about every 12 months.

AP40 PRO

AP30 PRO

AP60 PRO | AP80 PRO

Air purification redefined.

Keeping the air clean in large and heavily frequented rooms at all times is a real challenge. All components of our air purifiers interact perfectly. The filter technology, fans, and sensor technology in the IDEAL AP60 Pro and AP80 Pro have been designed with precision, while at the same time maintaining low noise and vibration. The multi-layer combination filter was developed specifically for the Pro models. The robust, high-grade metal housing blends in discreetly in any environment. Ideal for open-plan offices and conference rooms.

AP60 PRO

AP80 PRO

Maximum power
The flow-optimized air routing and the highly efficient radial fan allow for a large air throughput.

Near-silent night mode
Super-quiet operation in the background. In night mode, all lights in the display are also dimmed.

Perfect timing
With the timer function, the unit switches itself on or off automatically based on the preselected runtime.

AP140 PRO

For cleaner air and a healthier working environment.

The IDEAL AP140 Pro has been designed for industrial applications such as warehouses and logistics centers or print shops. The integrated GreenTech EC motor provides up to 50% lower energy consumption compared with AC solutions. Also ideal for open plan offices, hotel receptions and similar areas of application.

For larger room sizes
Ideal for larger room sizes of 1,400 square feet with a room height of 8.2 feet.

High air flow
The extra large inlets, outlets, and a giant fan promote air flow of up to 824 CFM.

Plug and play ready
The AP140 Pro can be used at any time from any location without the need for conversion work.

Our 360° smart filter with outstanding cleaning performance.

Reliable and effective.

Our specially developed HEPA filters with multi-stage filtration technology remove inanimate organic particles from your indoor air.

The 360° smart filter has five layers for cleaning performance. These layers also help remove dust, debris, pollen, and kitchen odors. The circular design ensures optimum utilization of the filter surface.
