

GoCrease[®] 3000

The GoCrease 3000 is a manual tabletop creasing and perforating machine with a 12.6" working width, offering high-quality performance for paper sizes up to 12.6" x 17.7". Its adjustable side guide, exchangeable knife, and minimal-effort operation make it ideal for processing heavy stocks or laminated documents.

- A CREAMER BASE**
The creaser base is constructed from durable, high-quality materials for stability and long-lasting performance.
- B STOP GUIDE LEVER**
The creaser has two sliding stops with adjustable tilting discs for precise crease and perforation alignment using a millimeter scale.
- C ERGONOMIC BAR**
Ergonomic bar for easy creasing with minimum use of force.
- D LOWER CREAMING BAR**
The solid cast aluminum blade mount features double pivot bearings for smooth and stable blade operation.

GoCrease[®] 3000

- Manual creasing and perforating tabletop machine with large working width for modern capabilities
- Ideal for processing graphic materials up to 12.6" x 17.7"
- Hand-operated machine provides the same high-quality results as electric models
- Eccentric wheel mechanism requires minimal effort, even for heavy stocks and laminated documents
- Angle-adjustable side guide allows for precise creasing and perforating of skewed paper
- Features an exchangeable creasing and perforating knife for versatile operation
- Includes three different creasing channel widths for flexible finishing options

Side Adjustment

Side adjustment wheels for quick exchange of paper position.

Side Guide

Side guide with skew adjustment for ease of use.
