**Top quality.
Made in Germany.**

You can never set standards high enough.

Here's an overview of our top features and services here:

LIFETIME GUARANTEE

Robust and durable: the cutting heads of Destroyit shredders are equipped with special hardened, solid steel cutting shafts with a lifetime guarantee (1-year limited warranty on SMC models).

ZERO ENERGY

The environmentally-friendly energy saving function of our shredders ensures automatic and complete power cut-off after 15 minutes.

EASY-TOUCH

Easy operation is guaranteed with the Easy-Touch multifunction switch for stand-by / stop (off) / reverse signals.

EASY-SWITCH

The large, intelligent Easy-Switch control element indicates the operational status of the shredder with illuminated color icons and back-lit symbols. It also provides an added degree of safety by functioning as an emergency stop switch.

SAFETY PROTECTION SYSTEM

Comprehensive SPS safety package: Electronically controlled safety flap in the feed opening; electronic door protection; automatic stop if the shred bin is full; double motor protection against overheating; automatic reverse and power cut-off (avoids paper jams);

AUTO OIL

Automatic oil injection on the cutting shafts during shredding for consistent high shred performance. Ideal for continuous operation. At the same time, absorbs shredded paper dust, thus helping to clean and maintain the cutting shafts.

ECC

Patented ECC – Electronic Capacity Control: this electronic feature indicates the used sheet capacity during shredding process to avoid paper jams.

ECO FRIENDLY

Only first-class, sustainably produced materials are built into Destroyit products. Certified environment and energy management systems according to DIN EN ISO 14001:2015 and 50001:2011 and Blue Angel eco-label.

TOP SERVICE

We offer professional assistance to handle any questions or technical problems.

Desk Side Shredders

Because personal information requires personal attention.

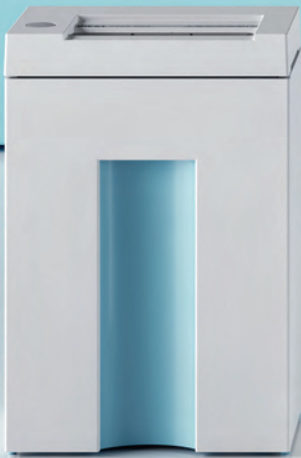

Ideal for individual workstations and small offices

Data protection has nothing to do with the amount of documents involved, merely the content. Even small amounts of paper need to be securely destroyed. The Destroyit desktop document shredders guarantee discretion and data protection, right where you need it: At your own desk. These devices are quiet, extremely user-friendly and can even be used in small, group offices if required. All professional shredders have a paperclip-proof cutting mechanism made of a special, tempered steel, and a quiet, energy efficient motor with a long service life. The Destroyit paper shredder is the perfect replacement for a waster paper basket in many desk-based workplaces and is as simple to use as a printer or copier.

Security within arm's reach

On a daily basis, there are a lot of documents that pass across a desk – even documents that contain sensitive and confidential data. A deskside paper shredder is one easy way to avoid astronomical consequences.

With data protection, it's not the amount of paper waste that is important, but the contents. Even if there's only a small amount of confidential information involved – one single page can be interesting enough for unauthorized third parties.

Centralized Shredders

Bespoke data protection for central use

Ideal for large work groups, open-plan offices or an entire office floor.

The Destroyit centralized shredders are your first choice for high power and a high shredding capacity. They are ideal for central use in offices, large work groups, open-plan workspaces, or on each floor of the office (for example next to the copier), and are especially easy to use. These shredders are designed to be intuitive – a big advantage when many different people will be using the shredder. The EASY-SWITCH makes all functions virtually self-explanatory. The generous feed opening of up to 16" is another decisive criterion for a central shredder that can cope with everyone's demand. The large collection capacity also makes sure that the Destroyit centralized shredders can cope with high volumes over long periods.

High Capacity Shredders

A giant among shredders

Ideal for large amounts of confidential materials.

No matter how much paper needs destroying, you should be able to keep the secure destruction of all confidential data under your roof, without having to outsource to external companies. An IDEAL document shredder allows you to operate independently of external disposal firms. All professional shredders in this range are suitable for continuous operation and even the basic document shredder in this class has sufficient capacity to cope with the paper shredding demands of a whole office floor. Powerful machines with practical feeders allow you to shred the entire contents of a waste paper bin, including crumpled paper. Other document shredder models have a large feed table with a conveyor belt, so that even large amounts of paper can be quickly and efficiently destroyed at a central location. The top document shredder can process up to 700 pages at a time and destroys entire ring binders, with their clips, with guaranteed high security.
