

PRESSURE SEALER IM8500

The IM8500 is a reliable inline pressure seal system designed for efficiency and productivity. With quick manual fold settings, automatic double feed detection, and dual-purpose inline or standalone operation, it easily integrates with leading laser printers. Its stacking capacity ranges from 350 to 650 sheets with the optional side conveyor.

A CONTROL PANEL
Includes auto stop and auto re-start function, electronic thickness detection, and batch counter.

B REVERSE FRICTION ROLLER
Unique RFR system, automatically detects, signalates, and corrects without any operator intervention for increased productivity.

C DUAL PURPOSE IN LINE AND STAND ALONE
Can be converted to run as a standalone machine if your printer becomes inoperable so you can load forms from other printers into the large feed table.

D BATCH COUNT
The Batch Count feature allows you to set a specific number of forms to process in each run. For instance, setting the count to 100 will stop the machine once it completes 100 forms.

PRESSURE SEALER IM8500

- Inline pressure sealer designed for smooth, reliable operation
- Quick manual fold setting enables efficient adjustments for different jobs
- Reverse friction roller infeed ensures accurate paper feeding and handling
- Job and batch counters for precise tracking of form processing
- Automatic double feed detection corrects misfeeds without user intervention
- Optional auto-extending conveyor stacker adjusts based on form volume for uninterrupted processing
- Integrates seamlessly with leading laser printers featuring rear exits
- Front-side jam removal tool ensures quick and easy paper jam access and resolution

Inline & Standalone

The machine can be configured for standalone operation, enabling forms from other printers to be loaded directly into the large feed table for efficient processing.

Conveyor Stacker

Optional auto-extending conveyor or vertical stacker can hold up to 650 processed forms. Cassette for professional results.
