

# MBM JOGGER

## JT7

The JT 7 tabletop jogger features a compact design, a 4" deep V-shaped paper tray, and offers both foot pedal and continuous operation modes. It effectively minimizes misfeeds and double feeds in printers, folders, and collators. Built with durable all-metal construction, the JT 7 is designed to meet all your paper jogging needs and deliver long-lasting performance.

**A PAPER TRAY**  
The paper tray features a vibrating mechanism to ensure precise paper alignment. Simply load a stack of paper with the edges facing down, and the vibration will automatically align the sheets for optimal performance.

**B CLAMP LEVER**  
This feature allows you to adjust and fix the angle of the paper tray. To adjust, hold the tray with one hand, loosen the clamp lever, and set the desired tilt angle. Once positioned, fully tighten the lever to secure the tray.

**C OPERATION PANEL**  
The panel controls the vibration function, allowing you to easily turn it on or off as needed.

**D FOOT SWITCH**  
When using the foot-operated power switch, pressing down on the foot switch activates the vibration function for the paper tray.

# MBM JOGGER

## JT7

- Tabletop jogger
- Reduces misfeeds and double feeds in printers, folders, and collators
- Compact, space-saving design
- Adjustable-angle V-shaped table
- 4-inch thick tray
- Foot pedal or continuous operation
- Durable all-metal construction

### Foot Pedal

The convenient foot pedal switch allows for hands-free operation.

### Power Switch

When the switch is set to "Cont" it starts jogging. When the switch is set to "Foot" it makes the unit operate only when the foot pedal is pressed.

### Specifications:
