

FOLD TYPES OF MBM FOLDERS

Accurately, precisely and automatically.

Ready to stuff envelopes in the blink of an eye. You save: Time and nerves. And your business correspondence makes a real impression with its flawless appearance.

The perfect combination of ease of use, speed, and precision.

MBM's paper folder machines give you the simplicity and versatility to complete a wide variety of folding jobs within minutes.

Time is money - so true when it comes to daily mailing in secretarial and sales offices, or in account departments. MBM paper folding machines offer a choice of different folds and formats, and in a matter of seconds prepare letters, circulars, flyers, invoices, and statements for easy insertion into envelopes. Operation is easy; For most machines, simply load with a stack of paper, refer to the symbols, set the paper positioning, and at the push of a button your letters and documents are folded!

QUICK RELEASE ROLLERS

Quick release rollers make regular maintenance and cleaning easy (208J, 408A, 508A, 1800S).

TOUCH-SCREEN

The LED color touch-screen automatically sets up standard folds at the touch of a button (408A, 508A).

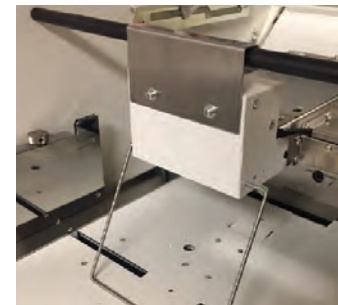

DOUBLE FEED DETECTION

The double feed detection sensor prevents mis-feed papers (408A, 508A, 1800S).

PAPER FEED / SEPARATOR PRESSURE ADJUSTMENT

Paper feed pressure adjustment and separator pressure adjustment prevents double feeds (508A).

BELT FEED SYSTEM

A belt fed, air suction system allows trouble-free feeding of coated stock (1800S).

DUAL FEED ROLLERS

The dual roller feed system feeds a wide range of stock (352F).

ENCLOSED TURBINE BLOWER

The low-maintenance blower does not require filter changes (352S).
