*THE PRODUCTS YOU NEED,
THE SUPPORT YOU DESERVE.*

About Us

Headquartered in historic Charleston, South Carolina, MBM delivers world-class Destroyit® paper shredders, Triumph® paper cutters and trimmers, AeroCut® Slitter/Cutter/Creasers and Die Cutter along with other state-of-the-art finishing equipment for the graphics and printing industries.

At MBM, innovative thinking and exhaustive research and development go into every product we sell. Our products are sold through an extensive dealer network throughout the United States and backed by a staff of knowledgeable service representatives and one of the best warranty packages in the business.

Our Canadian division, IDEAL.MBM, provides the same excellent sales and service support to our Canadian dealer network.

Whatever your security or print finishing needs, look to MBM to meet and exceed your expectations.

DESTROYIT®

Paper Shredders

From desktside document shredders to high-capacity industrial shredders.

Top quality, made in Germany. 🇩🇪

Destroyit paper shredders have set the industry standards for over half a century. Models are available in all 6 security levels defined under the DIN 66399 international standard. In addition to their innovative functional design, Destroyit paper shredders are UL listed, making them a safe and reliable choice to meet your shredding needs.

Desktside shredders put effective data security right at your side. Unlike cheaper brands, they are built with the highest quality materials and construction standards to provide years of dependable service.

Centralized Office models are commercial-grade, high-volume machines specifically designed to shred large amounts of material daily. Ideally, they are placed in a common area and shared by employees.

High-Capacity in-house shredding programs designed around Destroyit are the most secure and economical way of efficiently disposing of large amounts of sensitive documents, even 3-ring binders with their clips.

SAFETY PROTECTION SYSTEM (SPS)

SPS is a combination of innovative design features found on every Destroyit paper shredder, which ensures the highest standards of safety.

These SPS features include a patented, electronically controlled transparent safety shield in the feed opening, an electronic switch that stops power to the motor when the cabinet is opened or the shred bin is full, automatic reverse and power cut-off when overfed, and double protection against overheating. The environmentally friendly zero energy consumption feature is a power-saving sleep mode that activates after 30 minutes of inactivity.

All Destroyit shredders are made from specially tempered steel. They have quiet, energy-efficient motors and a long service life. Strip and cross-cut models have a paperclip-proof cutting mechanism and are covered by a lifetime warranty.

Easy Does It

The large, intelligent Easy Switch control element indicates the operational status of the shredder with illuminated color icons and back-lit symbols. It also provides an added degree of safety by functioning as an emergency stop switch.

TRIUMPH®

Paper Cutters

Premium materials, state-of-the-art manufacturing, and stringent quality controls guarantee durability. A Triumph cutter is designed to last for years and consistently perform as well as it did on the day you purchased it. Top quality, made in Germany. 🇩🇪

Print shops today are navigating a landscape of increasing digital printing, short print runs, quick job changes, and extremely short-term delivery times. Triumph paper cutters, with cutting lengths from 16.8" up to 28", are designed to meet these evolving requirements. They offer a flexible and cost-effective solution, with an ease of operation and cutting results that remain consistently perfect.

TRIUMPH™

SPEEDCUT

Triumph Speedcut models feature an intelligent user interface with a split display, easy step-by-step cutting program guidance, and programmable clamp pressure.

More speed, power and output: 40% faster clamping and cutting. 50% higher maximum clamping pressure. 100% faster back gauge.

SAFETY CUTTING SYSTEM

Our comprehensive Safety Cutting System (SCS) combines innovative design features that ensure the highest standards of safety. They protect the operator during the cutting process and while performing routine maintenance - without disturbing or slowing down the working process. The SCS also provides security when the cutter is not in operation, for instance, during the blade or cutting stick change, which can be done conveniently without removing machine covers.

Triumph paper cutters, which are UL listed, are a safe and reliable choice for all your cutting applications. Wherever paper needs to be cut precisely, safely, and quickly, the Triumph cutters have you covered. The optical cutting line indicator with bright and durable LEDs guarantees easy alignment of cutting marks for precise cuts.

EASY CUT Bars

Patented EASY CUT blade activation bars provide true two-hand operation (models 4315 and above).

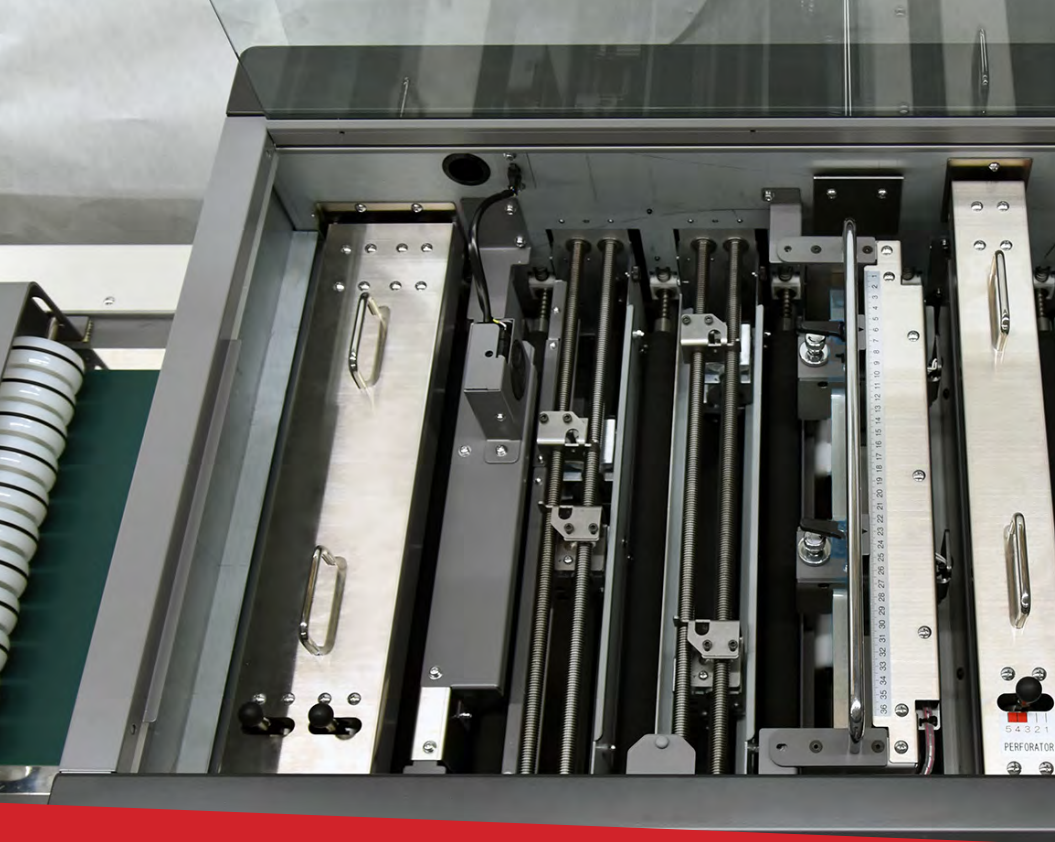

IR Safety Curtain

Light beam safety curtains on Triumph cutters ensure the highest level of safety (models 5260 and above).

VRcut is a groundbreaking PC software solution designed to automate the cutting workflow.

VRcut is a PC software solution that intelligently bridges the gap between pre-press and the finishing process. It promotes an efficient and error-free cutting process, allowing operators of any experience level to cut with confidence on the Triumph 7260, 5560/5560 LT, 6660, and 5260 cutters. These select cutters now come with everything you need right out of the box with the Controller Hardware Kit at no cost!

AeroCut

Digital Finishing

The AeroCut all-in-one finishing systems will take your digital production to the highest level.

The MBM AeroCut line is a collection of premium digital finishing machines with an array of features to help print shops meet the strict demands of today's digital market. With these all-in-one machines, you can make business cards, postcards, greeting cards, tent cards, leaflets, signs, tickets, and much more on select models. Most paper printed on digital printers can easily be finished on select AeroCuts, including prints incorporating barcodes. Changeover to the next job requires no PC connection and is accomplished in seconds.

Surprisingly fast finishing, incredibly easy setup and operation, and innovative controls that put you in the driver's seat. The AeroCut digital finishing solutions line offers versatile finishing choices and much more, making them the most ground-breaking machines on the market.

All AeroCut models feature the patented Tri-Suction Feed Mechanism, which minimizes adjustments to reduce the risk of double feeds and jams. The self-correcting cut mark registration ensures accurate cuts every time, and quick-release rollers make cleaning easy.

AeroDieCut

The redesigned die cutter is ideal for short-run digital print finishing.

The AeroDieCut, a state-of-the-art platen die cutter, is designed with a strong focus on operator safety. It can process complex cuts, creases, and perforations in a single pass, using your existing traditional steel rule dies, significantly reducing production time. The AeroDieCut is designed to be used by anyone, anywhere, with minimal mechanical adjustments, ensuring a secure working environment.

INTELLICUT™ By **LYTROD™**
SOFTWARE

Intellicut unifies the PC Controller, PDF imposition, and AeroCut programming.

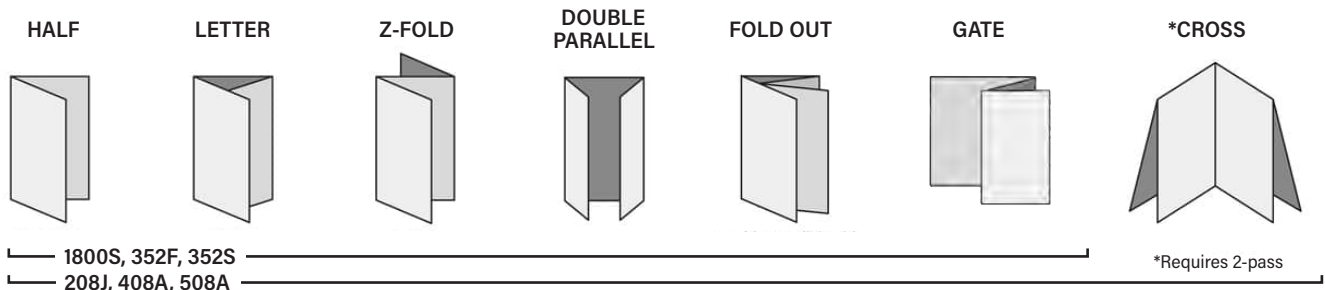

The AeroCut family of Slitter/Cutter/Creaser Finishers come standard with an embedded controller and Intellicut software. The software integration through network connection uniquely delivers a higher level of automation to the slitter/cutter/creaser digital finishing workflow and reduces tedious and time consuming prepress and post-press finishing tasks. Get the smart machine: AeroCut with Intellicut!

Paper Folders

From manual to automatic programmable, and for corporate applications to high-volume postpress operations.

MBM folders offer the optimum combination of speed, precision, and ease of use, making them perfectly suited for small offices, schools, and corporate environments. For professional printing applications, where efficiency is at a premium, MBM automatic programmable models store multiple fold programs in memory and can be set up to run at the touch of a button. Advanced features such as automatic feed tables, self-setting exit rollers, and micro-adjustment dials ensure an excellent finish to every job.

Bookletmakers

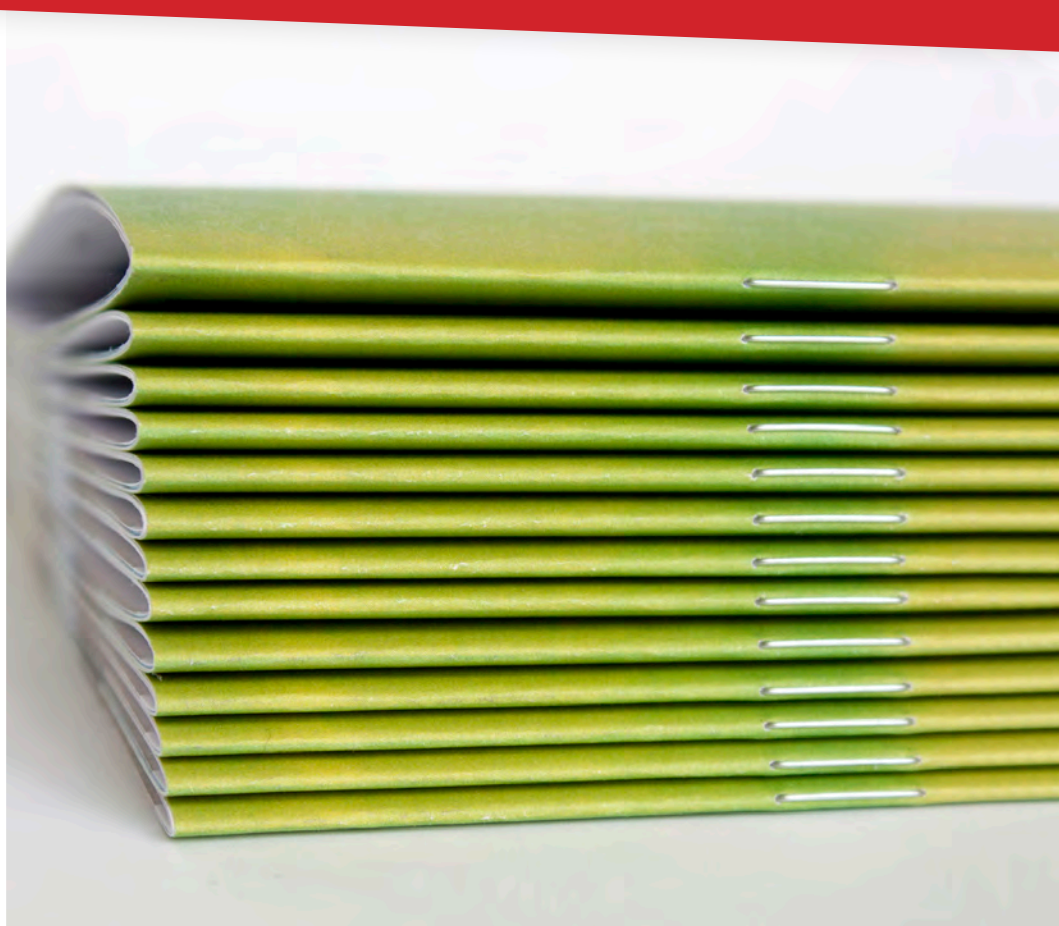

Speed and versatility are the hallmarks of MBM bookletmakers.

MBM Bookletmakers were created to significantly increase the speed at which booklets can be bound. They are designed for everyone from individuals to large businesses and production centers. Our bookletmakers are not only easy to use, but also designed with the user in mind, offering many additional features to make binding books easier. Select models utilize wire-fed stitching technology previously found only in larger systems costing up to three times more, and an optional face trimmer can be combined on select models to create the ultimate booklet finishing system.

GoCrease[®] Creasers

Perfect for digital applications, GoCrease creasers allow documents printed on heavy or coated stock to be creased prior to folding, creating a crisp, more accurate fold with no cracking.

Our creasers include equipment that covers all creasing needs, from a manual tabletop, to a semi-automatic creasing and perforating machine. Each machine is built with the same quality and care as our other products and is backed by the industry's best warranty.

TRIUMPH®

Paper Trimmers

Triumph trimmers are built to the exact tolerances of Triumph cutters. They deliver clean, accurate cuts every time, perfect for professional or personal use. They ensure that your project and materials are flawlessly trimmed.

With cutting lengths of 13" to over 43", Triumph trimmers are helpful tools for offices, studios, schools, workshops, interior-decor departments, and many more. Select models can handle poster board, cardboard, film, metal foils, linoleum, and other materials. Triumph trimmers feature sturdy, all-metal construction and the finest Solingen steel blades, and every model features stationary or movable transparent Lexan safety guards. Elevate your cutting tasks with the precision, durability, and exceptional performance of Triumph trimmers.

Support Products

MBM offers a wide range of support products to streamline your workflow. From paper jiggers and pressure sealers to drills, we have the tools to meet your needs.

Pressure sealers simplify the mailing process by creating secure, self-sealing documents. Ideal for invoices, checks, and confidential mail, these machines fold and seal documents in a single pass, eliminating the need for envelopes. With 5 models to choose from, MBM has the right pressure sealer for you.

Our paper jiggers are essential for aligning sheets of paper and quickly removing static electricity and misalignments, ensuring a smooth and accurate stack. Perfect for print shops, offices, and mailing rooms, our paper jiggers help you achieve flawless results with minimal effort, boosting your productivity and efficiency.

Air Purifiers

Bring some clean air into your daily life with high performance air purifiers from IDEAL.

Whether at home or work, we spend up to 90% of the day in enclosed spaces. The air we breathe indoors is often dirtier than outside air. The powerful, German-made air purifiers from IDEAL clean your air reliably, effectively, and silently – a difference you can feel.

SHREDDERS

Deskside and Centralized Office strip and cross-cut models:

- lifetime limited warranty on cutting shafts and wheels
- 3-year limited warranty on all other parts, excluding wearables
- 90-day limited warranty on labor or exchange at MBM's discretion

High Capacity and Super Micro Cut models:

- 1-year limited warranty on cutting shafts and wheels
- 1-year limited warranty on all other parts, excluding wearables

CUTTERS, FOLDERS, CREASERS, COLLATORS, TRIMMERS, SUPPORT PRODUCTS AND INTERFACES

- 1-year limited warranty, excluding wearables
- 6-month limited warranty on pressure sealers, excluding wearables

Warning: Use of non-approved cutting blades damages the machine, thereby voiding the warranty.

DIGITAL FINISHING PRODUCTS (X PRO, X, NANOMAX, AERODIECUT)

- 1-year limited warranty, excluding wearables

BOOKLETMAKERS AND FACE TRIMMERS

- 1 year limited warranty, excluding wearables

AIR PURIFIERS

- 1-year limited warranty, excluding wearables

FAN1

- 90-day limited warranty, excluding wearables

REPLACEMENT PARTS

- 1-year limited warranty on mechanical parts, 90-day limited warranty on electrical and electronic parts

MBM agrees to repair or replace, at its option, any defective part or component covered by this warranty, provided there is no evidence of abuse and we first receive written notice of a defect within the applicable warranty period. Wearable items are not covered under warranty. Wearable items include but are not limited to: VRCut Controller Hardware Kit, knives, sticks, staple heads, light bulbs, rubber rollers, belts, feed stones, separator pads, fuses, gears, clutches, and brakes. This warranty extends only to the original purchaser and does not include labor or the payment of any labor charges or incidental or consequential expenses. Warranty claims must be submitted with a replacement part order. MBM makes no further warranty of any kind and specifically disclaims any warranty of merchantability for a particular purpose. F.O.B.
