AeroCut nano Max
Digital print finishing system with Tri-Suction Feed Mechanism featuring InstaSet bar and color touch screen with Flex Mode for accurate slitter positioning.

A **PATENTED TRI-SUCTION FEEDER**
The Feeding Mechanism reduces risks of double feeds and mis-feeds drastically, therefore preventing paper jams inside and enhancing productivity.

B **QUICK-RELEASE ROLLERS**
The AeroCut nanoMax has new quick-release rollers and components, making cleaning easy. In case of a paper jam, this feature assists in a quick recovery.

C **TOUCH SCREEN UI**
The nanoMax is equipped with a color touch screen. Cut mark registration and image shift & stretch compensation function help an operator to make fine adjustments to digitally printed stocks.

D **VERSATILE INSTASET BAR**
The Bar indicates and aligns slitter positions accurately and can be easily adjusted manually without tools. Built-to-order bars are available for custom sized jobs, at lower cost compared to "slitter cartridges".
