

The IM8500 is a reliable inline pressure seal system designed for efficiency and productivity. With quick manual fold settings, automatic double feed detection, and dual-purpose inline or standalone operation, it easily integrates with leading laser printers. Its stacking capacity ranges from 350 to 650 sheets with the optional side conveyor.

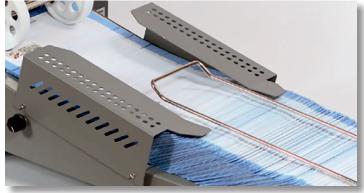

- A CONTROL PANEL
 Includes auto stop and auto re-start function, electronic thickness detection, and batch counter.
- REVERSE FRICTION ROLLER
 Unique RFR system, automatically
 detects, signulates, and corrects
 without any operator intervention for
 increased productivity.
- Can be converted to run as a standalone machine if your printer becomes inoperable so you can load forms from other printers into the large feed table.
 - BATCH COUNT
 The Batch Count feature allows you to set a specific number of forms to process in each run.
 For instance, setting the count to 100 will stop the machine once it completes 100 forms.

- Inline pressure sealer designed for smooth, reliable operation
- Quick manual fold setting enables efficient adjustments for different jobs
- Reverse friction roller infeed ensures accurate paper feeding and handling
- Job and batch counters for precise tracking of form processing
- Automatic double feed detection corrects misfeeds without user intervention
- Optional auto-extending conveyor stacker adjusts based on form volume for uninterrupted processing
- Integrates seamlessly with leading laser printers featuring rear exits
- Front-side jam removal tool ensures quick and easy paper jam access and resolution

Conveyor Stacker

Optional auto-extending conveyor or vertical stacker can

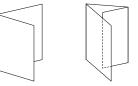

hold up to 650 processed forms.

Cassette for professional results.

Inline & Standalone

The machine can be configured for standalone operation, enabling forms from other printers to be loaded directly into the large feed table for efficient processing.
